Rapidly changing interactions between the Earth’s environment and human activities drive the research and teaching at the University of Washington’s College of the Environment. By connecting some of the world’s leading educators and researchers with students, practitioners, and citizens, the College cultivates communities who work with and learn from each other as they tackle the environmental challenges of the 21st century.

THE COLLEGE

- The College is a world-class environmental hub focused on improved understanding of the interactions of the earth’s environment and human activities
- Public and private funding in excess of $118 million annually supports world-renowned research on climate, ecology, natural resource management, and marine, earth, and space processes
- We offer over 20 degree programs, ranging from bachelor to doctoral, with nearly 400 degrees awarded annually
