NPLCC Seeks Tribal Climate Change Management Intern

In partnership with the Affiliated Tribes of Northwest Indians (ATNI) and Indian Affairs Northwest, the North Pacific Landscape Conservation Cooperative (NPLCC) is pleased to announce a tribal climate change management internship opportunity working in our Olympia, WA office.

In addition to the NPLCC position, there are 5 other tribal climate change research and management opportunities with ATNI and Bureau of Indian Affairs in Oregon and Washington. These paid internships will last 13 weeks over the summer months and candidates must currently be enrolled in graduate or undergraduate degree programs. Candidates will be considered from a range of academic backgrounds including public affairs, social policy, legal, engineering, environmental science, environmental management, or similar degree.

The intern selected to work with the NPLCC will assist in collaboration with area Tribes and First Nations to understand and adapt to our changing environment. Specific tasks include:

- Planning and support of a regional Tribe/First Nation Committee gathering
- Assisting NPLCC Science/Traditional Ecological Knowledge and Communication staff and subcommittees in improving how we connect with our Tribe and First Nation partners
- Develop strategies that improve coordination between the NPLCC and other forums that engage tribes on climate-related topics
- And much more!
This partnership offers the NPLCC a great opportunity to strengthen our engagement with Tribes and First Nations and we look forward to choosing a dynamic applicant.
